Services and Description: The P.O.W.E.R. Sisters Project offers women whose use of alcohol and other drugs affects their ability to care for their children an opportunity for intervention, including assessment and referral to treatment, comprehensive integrated resource coordination and mentoring. This intervention assists families in staying together whenever possible. The goal is to promote healthy family relationships that can survive and thrive without requiring the services of the child welfare system. P.O.W.E.R. collaborates with the Office of Children, Youth & Families, as well as with Magee-Womens Hospital where a prevention-based component offers these same services. By working together, referrals are received and screening assessments conducted, with the consent of the client, so as to facilitate the appropriate level of treatment and care as quickly as possible.

Pittsburgh, PA 15213
Phone: 412-383-2700

Service Description: Dual Diagnosis Programming (Partial Hospital, Intensive Outpatient, Outpatient, Ambulatory Detox):

Outpatient Counseling: this involves individual, group or family treatment once per week or less often. Length of time in treatment is variable from a few sessions with a “motivational and/or educational” focus to 6-12 months of therapy.

Intensive Outpatient Program (IOP): IOP involves 5-10 hours of clinical programming per week, in 2-3 days, usually in a group format, for a length of stay of 3-6 weeks. IOP combines both psychoeducational recovery groups and therapy groups in which clients determine specific problems and issues to discuss. Individual and/or family sessions may be provided.

Partial Hospital Programming (PH): PH involves 10 or more hours of programming per week on at least 3 days each week. Although group is the main modality used, licensing regulations require that each PH client receive two individual sessions per week. Length of stay in the non-acute partial is 2-6 weeks and the length of stay for acute partial hospital is 2-4 weeks.

Ambulatory Detoxification: Outpatient detox with extended on-site monitoring, which is done in conjunction with Partial Hospital program.
