Part of New England Road Reopens to Traffic; Another Section to Close August 10

PITTSBURGH – The Department of Public Works announced today that New England Road has reopened to traffic at its intersection with Smith’s Lane in West Mifflin Borough. The closure, which began on July 6, 2020, was required for preservation of Pine Run Bridge No. 4, including replacement of the bridge deck and an inlet, installation of scour protection and guide rail, and approach roadway work.

The work is part of an ongoing project on New England Road that will require another closure – about 1,200 feet southeast of Smith’s Lane – starting at 9 a.m. on Monday, August 10, 2020. That closure, which is expected to end in October 2020, is required for replacement of Pine Run Bridge No. 3, including construction of a concrete box culvert with outlet wing walls; installation of scour protection, storm drains, and guide rail; as well as approach roadway work.

When that closure begins, traffic will be detoured using Clairton Road (Route 885), Lebanon Church Road, and Camp Hollow Road.

Earlier this year, New England Road was closed at Amblers Lane for replacement of Pine Run Bridge No. 5.

The project, which is being done by Pugliano Construction Co., Inc., of Pittsburgh, is part of the $1.6 million 2019 Capital Bridges contract.
