\*Cases meeting the 2020 CDC criteria for reporting were included. Case classification status (confirmed, probable, possible, suspect, unknown, not a case) is factored into the criteria used by the CDC to determine reporting.

\*\*STD reports are excluded from this table but are included in a separate report on the ACHD website.

\*\*\*Print criteria changed sometime between 2011-2020

\*\*\*\*Most Lyme disease reports were not investigated in 2015-2020, so the numbers here vastly underrepresent the burden of disease

¥ The case definition for acute hepatitis C changed in 2020
