General Comments:

EH Supervisor C. Angel present for inspection. Inspector contacted facility owner via phone call during inspection.

Facility is subject to immediate closure due to lack of functional sewage system. In order to reopen, the following conditions must be met:

1. Repair the sewage backup
2. Empty the entire basement.
3. Disinfect the entire basement.
4. A service contract must be provided for the grease interceptor maintenance.
5. Access must be allowed to the basement during routine inspections. A key must be on premises and available at all times, or additional orders will be given to move the grease interceptor upstairs.

Note to the landlord: There is evidence of a black mold-like substance in the basement. It is recommended to fix this issue to improve working conditions for employees. Be advised - mold exposure can be hazardous to your health. See '<https://www.cdc.gov/mold-health/about/index.html>' for more details about mold.
