

Report to the Jail Oversight Board Pursuant to Allegheny County Code Chapter Section 205-30 - Methodology

The attached report is in three sections:

1. **Pod Lockdown Report**, identifying locations, dates and reasons for sections of the Jail that were locked down during the month in question.
2. **Intake Segregation Report**, identifying the number of times any person was held in Intake > 20 hours during the month in question, including duration, age, gender, race and ethnicity.
3. **Pod Segregation Report**, identifying the number of times any person was housed in a pod or cell deemed to be segregated housing during the month in question, including the number of episodes for the individual, duration of each episode, reason, age, gender, race and ethnicity. Each row in this report represents an episode, and episodes for a single individual are shown consecutively so, for example, Episodes 1 of 3, 2 of 3 and 3 of 3 in the first three rows of the report relate to a single individual.

The report uses data records in the Offender Management System to track housing of incarcerated individuals during the 'jail intake' process and 'post-jail commitment.' Demographic information regarding the individuals in this report was matched using Allegheny County Department of Human Services' data warehouse, which provides robust client matching from information gathered from multiple human services programs, court, and jail data.

This report includes all individuals who were in **segregated housing** at all during the month of analysis, even if their episode began before the month. The duration identified includes the entire time period of that segregated housing/isolation episode.

Some terminology used in this report is defined below:

- Individuals in 'jail intake' are housed in cells (i.e. their movement is restricted) until they complete the following processes: ID Department, Pre-Trial Services and Pre-Arrestment. Individuals identified in this report are those in intake (i.e. confined to a cell) for more than 20 hours in a single intake instance.
- After an individual is committed to the jail, their housing in certain designated areas (see below) is defined as '**segregated housing**.' The individuals in this report were housed in one of those designated areas at least once during the month in question.
- In this report, a housing location is defined as a particular section, block, and cell combination, with the term '**unit**.'
- The units deemed to be segregated housing are:

Section	Block	Cell
LEV4	PODF	201 – 213
LEV5	PODC	ALL
LEV5	PODD	ALL
LEV5	PODF	119 – 128
LEV5M	PODD	ALL
LEV8	PODE	ALL

- In this report, a segregated housing '**episode**' is defined as starting when an individual is moved into a segregated housing unit and ending when they are moved to a non-segregated housing unit or released. Any movement from one segregated housing unit to another segregated housing in succession is aggregated together into an episode.
- **Duration** is defined as the time between an individual enters a segregated housing unit and the time they are: (1) move to a non-segregated housing unit, (2) are released from jail, or (3) the end of the month of analysis.
- **Age** is defined as the age of the individual at the beginning of intake for the 'isolation' analysis, and the age of commitment for the 'segregated housing' analysis.
- **Gender** is the self-reported sex of the individual. Note that there were no individuals in segregated housing during this initial reporting period (June, 2021) who had a separate gender identity.

Note that the data in this initial report are subject to change based on expected further refinement of this reporting process.

July 7, 2021
