

## Appendix A: Selected DHS Applications

The Solution must provide connectors or application programming interfaces (APIs) for custom integration to these adjacent applications:

1. In-house Oracle Data warehouse - The [DHS Data Warehouse](#) brings together and integrates person and service data from a wide variety of sources both internal and external to the county. These include various case management, client record management, and reporting portals required by the funding agencies and governing bodies of the multiple service systems DHS manages (see Appendix B, “Custom applications” for more information).
2. [Oracle Cloud](#) - Oracle Cloud is a cloud computing service offered by Oracle Corporation providing servers, storage, network, applications and services through a network of Oracle Corporation managed data centers.
3. [Oracle JD Edwards EnterpriseOne](#) - J.D. Edwards is used by DHS’ Office of Administration and various County Departments for financial management, human resources and payroll, and asset management purposes.
4. [DocuSign](#) – Electronic signature collection software
5. OnBase [Unity Client](#) – OnBase enterprise content management and process management software is used County-wide for contract document storage
6. Action Tracker - Action Tracker is a custom-developed software application currently used by 20 County departments that supports department- and county-wide approval processes.
