

Integrated Dual Disorder Treatment Model (IDDT) (Half-Day Workshop)

The Integrated Dual Disorder Treatment (IDDT) model is an evidence-based practice that improves the quality of life for people with co-occurring severe mental illness and substance use disorders.

In this training, participants will review the importance of utilizing integrated treatment, understanding stages of change and stages of treatment, and developing stage-appropriate interventions. Additionally, we will review the role of every team member and their individual responsibility in providing the practice and outlining the Co-Occurring Disorders Specialists' role in implementing IDDT, specifically in the staging process and delivering clinical interventions.

Course Outcomes:

1. The participant will understand the Integrated Dual Disorder Treatment Model and the importance of providing stage-appropriate interventions.
2. The participant will demonstrate the ability to match the client's stage of change with stage-appropriate interventions.

Course Details:

Trainer Name: Kelly Burda
Trainer Email: Kelly.Burda@AlleghenyCounty.US
Location: ZOOM
Times: 9:00 a.m. to Noon
