Lead is a serious public health issue. Lead exposure can cause permanent damage to the brain, especially in young children. Exposure to lead can also cause long-term health problems in adults. To learn more about lead poisoning prevention, please visit the following websites:

www.epa.gov/lead
www.achd.net/lead
www.cdc.gov/nceh/lead

To report suspected lead poisoning, please contact the Allegheny County Health Department at 412-687-ACHD (2243) or visit www.achd.net/lead.
peripheral neuropathy to an effect of dosage? The effects of high dosage on the peripheral neuropathy are only temporary. The patient's peripheral neuropathy was improved significantly for 6 months by a dosage of 5 mcg/L. The patient was followed for 1 year after the improvement. The patient reported a significant decrease in the severity of the peripheral neuropathy during the follow-up period.
