Dear Recycler:

Allegheny County appreciates your desire to recycle. To assist you in that effort, we have developed this directory of locations in the County which accept various materials for recycling -- from glass containers to polystyrene loose fill.

We hope that you are able to find a location close to you to take the items you wish to recycle. This directory is divided into three sections:

→ List of recyclers by material type (such as glass, newsprint, etc.) and location in the County (North, South, East, West, or Pittsburgh)

→ List of recyclers in alphabetical order (listing address, phone number, hours of business and materials accepted)

→ List of commercial, large volume recyclers

For items not listed in this directory, such as used motor oil, please call the Pennsylvania Department of Environmental Protection (DEP) Recycling Hotline at 1-800-346-4242, or the Allegheny County Recycling Office at 412-578-8390.

Thank you for your interest in recycling. An electronic version of this document is available on our website at https://www.alleghenycounty.us/healthdepartment/. Please help us keep our directory current by letting us know of any changes to the listings.

THE HOME ITSELF

✓ Keep your furnace tuned; an inefficient heating system will waste 20% of the energy it uses.
✓ Replace an old (20 years) heating system with a new, energy-efficient one.
✓ Maintain your thermostat in winter at 65-68°F during the day, 55°F at night, or better, install an automatic setback thermostat. Senior citizens have special heating needs.
✓ Check for and seal off heat leaks.
✓ Use your air conditioner only when necessary; open windows and turn on fans during cool nights.
✓ Make sure your insulation is sufficient; this includes hot water pipes, heating ducts and crawl spaces.
✓ Weatherstrip and caulk windows and doors. In the winter, keep windows closed and shades pulled to conserve energy.
✓ Close the fireplace damper when not in use.
✓ Switch to energy-efficient lighting, such as “Supersaver” incandescent bulbs or compact fluorescent bulbs.
✓ Use dimmer controls and “task” lighting. Turn off lights when not needed. Remember that light-colored walls will make the house seem brighter.
✓ Set your water heater at the lowest setting that will provide you with sufficient hot water; that would be the “medium” setting, unless you have a dishwasher, which requires hotter water.
✓ Wash only full loads in the dishwasher. Don’t waste water by pre-rinsing.
✓ Top-freezer refrigerators are more efficient than side-by-side models.
✓ Choose the right size refrigerator and keep it full; food retains cold better than air.
✓ Position the refrigerator out of direct sunlight.
✓ Clean refrigerator condenser coils annually; replace door seals when they deteriorate.
✓ Microwave ovens and crock pots are more efficient for heating small quantities of food.
✓ Wash clothes with warm water and rinse with cold water.
✓ Use non-phosphate laundry detergents.
✓ Dry only full loads in the clothes dryer; clean the lint trap between each load. Air drying is the most energy-efficient procedure.
✓ Install water-saving showerheads and faucet aerators.
✓ Take short showers rather than baths.
✓ Repair leaky faucets and toilets.
✓ Reduce the amount of junk mail you receive by writing: See Page 27 of this directory.
POLLUTION PREVENTION
OUTSIDE OF THE HOME

✓ Minimize the use of pesticides. When you do use them, follow the label
directions carefully.
✓ Select plant species that are resistant to insects and diseases. Provide
habitat for birds that prey on insects.
✓ Planting deciduous trees near your home will reduce heating and
cooling bills.
✓ Cut grass 2" to 3" high. Fertilize and water only as required.
✓ Compost your yard wastes and use the compost as a natural fertilizer.
Call Allegheny County’s Recycling Coordinator for a booklet on
composting how-to.
✓ Avoid spills when refueling your mower.
✓ Don’t use your hose as a broom; sweep your driveway.
✓ Use water-based products (paints, etc.) whenever possible.
✓ Never dump waste oil into a drain; take it to a service station for
recycling.
✓ Combine several errands in one auto trip to reduce air pollution.
✓ Try walking or biking for short errands.
✓ Buy only fuel-efficient autos; get regular tune-ups.
✓ Drive at a steady speed. Start and stop evenly.
✓ Avoid driving during peak traffic hours.
✓ Buy products that have the least negative impact on the environment;
this is “green consumerism”.
✓ Buy in bulk or buy concentrated products when possible. Avoid buying
disposables.
✓ Use items with recycled content whenever possible.
✓ Buy goods with the least amount of packaging and in recyclable
containers.
